

Top 5 Tips for Cyber Security

01

Set up multi-factor authentication on your devices

Choose to get a code sent to another device when logging in online. This is an added layer of security on your accounts.

03

Beware of suspicious emails, SMS and phone calls

Stop and think before clicking on links or giving away personal information. Never give out information such as credit card details, bank account details or passwords.

02

Never leave your devices unattended

Never leave your devices unattended. If you are stepping away from your desk, lock your screen with a unique password.

04

Be mindful of devices you plug into your computer

If you find a USB or external hard drive lying around, do not plug it into your device.

05

Never use public Wi-Fi

Avoid using free public wi-fi . If you require internet access, use a secure hot spot.
